

INSTRUCTIONS FOR COLONOSCOPY USING PICOLAX

MUST BE DONE IN ALL CASES

- Stop taking iron and any medication or natural product known to increase the risk of bleeding such *Plavix* 10 days before the examination.
- If you take *warfarin (Coumadin)*, please obtain instructions from your physician.
- You will not be able to drive after the examination. We prefer that you be accompanied or your test will be **CANCELLED**

Your colon has to be **COMPLETELY EMPTY** in order to perform a successful colonoscopy. It is important to follow these steps:

2 to 3 DAYS BEFORE THE EXAMINATION:

-Eat Soft Diet, nothing solid. Drink only clear fluids all day

THE DAY BEFORE THE EXAM:

-Drink only clear fluids **for the entire day up to midnight** (see list below). No solid foods are allowed.

-At **02:00 pm** empty content of first Picolax Sachet in 250ml of water followed by 8-10 glass of water within 2 hours or even more. It may take 1-3 hours for your bowel movements to become progressively loose and watery (clear).

-At **07:00 pm** take the second Picolax Sachet (follow same instructions). Continue to drink clear liquids to prevent dehydration. All liquids must be stopped at midnight.

-At **10:00 pm** take Bisacodyl 10mg tablets.

THE DAY OF EXAM:

If you take blood pressure or heart medication take it before **6:00 am** with sip of water only.
