

FIRE EVACUATION PLAN FOR PHDU

-Rinsy Joseph

INTRODUCTION

Fire evacuation procedure in RH

- It is created by the fire prevention department which includes the action to be taken by all staff in the event of fire and the arrangements for calling the fire safety officer.

Code red team members during normal working hours

- D.G or whoever act
- Fire officer
- Nursing officer
- PRO
- Eng controller

Lesson plan

- In the event of a fire on the ward all staff must be fully familiar with
 - The procedure for reporting the fire and calling for assistance
 - The location of fire fighting equipments and how to use it correctly
 - The movement of pts to a place of safety
 - In the very first instance fire is discovered the alarm must be raised
 - shout fire to bring colleagues immediately to your assistance
 - Activate the manual fire alarm call point to ring the fire alarm bell
 - Code 9777
- Smoke and heat detectors throughout wards

Five classes of fire

- Class A - these are commonly flammable material as there fuel sources .
- Example -wood ,fabric , paper, trash , plastics
- Class B - defined as flammable liquid or gas.
- Example - oil, paints ,kerosene, gasoline, flammable gases such as butane or propane are common sources.
- Class c - defined as fire that uses electrical components or energized equipments.
- Class d- defined as that uses combustible metal as its fuel sources
- Example - metal include titanium, magnesium and potasium these are danger in laboratory environments
- Class k - defined as cooking fire involving combustion from liquids used in food preparation.

CHARACTERISTICS OF FIRE EXTINGUISHERS

- **DRY POWDER** Fire extinguishers are colored blue or red with light blue band , they are multipurpose can be used for fight solid ,liquid and gas.
- **FORM** fire extinguisher colored cream or red with a cream band ,used to fight solid and liquid fire.
- **CO2** fire extinguishers are colored black or red with a black band, it can be used to fight , b and c class fire .
- At each end of the ward you will find a fire point - in the upper cabinet there is a automatic fire hose reel -in the lower cabinet there are 2 x 6 litres foam extinguisher.
